Revision: 0

SD0127 v2.4 RS 503-335, 566-730

SAFETY DATA SHEET

RS Pro Contact Treatment Grease

According to Regulation (EC) No 1907/2006, Annex II, as amended.Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of	the substance/mixture and of the company/undertaki	ng	
1.1. Product identifier			
Product name	RS Pro Contact Treatment Grease		
Product number	503-335, 566-730, ZP		
1.2. Relevant identified uses	of the substance or mixture and uses advised agains	t	
Identified uses	Lubricant.		
Uses advised against	No specific uses advised against are identified.		
1.3. Details of the supplier of	f the safety data sheet		
Supplier			
	RS COMPONENTS		
	BIRCHINGTON ROAD		
	CORBY		
	NORTHANTS NN17 9RS UK +44 (0) 1536 402888 (8am to 8pm)		
	+44 (0) 1536 402888 (8am to 8pm) +44 (0) 1536 401588		
	RCustomerServicesUK@rs-components.com		
1.4. Emergency telephone n			
Emergency telephone	+44 (0)1865 407333		
SECTION 2: Hazards identif			
2.1. Classification of the sub			
Classification (EC 1272/2000 Physical hazards	5) Not Classified		
Health hazards	Not Classified		
Environmental hazards			
	Not Classified		
2.2. Label elements			
Hazard statements	NC Not Classified		
2.3. Other hazards			
This product does not contain any substances classified as PBT or vPvB.			
SECTION 3: Composition/information on ingredients			
3.2. Mixtures			
Propylene carbonate			1-5%
CAS number: 108-32-7	EC number: 203-572-1	REACH registration number: 01- 2119537232-48-XXXX	

Classification

Eye Irrit. 2 - H319

The full text for all hazard statements is displayed in Section 16.

Revision date: 21/02/2017

Revision: 0

RS Pro Contact Treatment Grease

SECTION 4: First aid measures

4.1. Description of first aid measures		
General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel.	
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Skin contact	Remove affected person from source of contamination. Rinse immediately with plenty of water.	
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.	
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.	
4.2. Most important symptoms	s and effects, both acute and delayed	
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.	
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.	
Skin contact	Prolonged contact may cause dryness of the skin.	
Eye contact	May cause temporary eye irritation.	
4.3. Indication of any immedia	te medical attention and special treatment needed	
Notes for the doctor	Treat symptomatically.	
Specific treatments	No special treatment required.	
SECTION 5: Firefighting measurements	sures	
5.1. Extinguishing media		
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.	
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.	
5.2. Special hazards arising fr	om the substance or mixture	
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up.	
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.	
5.3. Advice for firefighters		
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak.	

Revision: 0

RS Pro Contact Treatment Grease

Special protective equipmentWear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective
clothing. Firefighter's clothing conforming to European standard EN469 (including helmets,
protective boots and gloves) will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautionsNo action shall be taken without appropriate training or involving any personal risk. Keep
unnecessary and unprotected personnel away from the spillage. Wear protective clothing as
described in Section 8 of this safety data sheet. Follow precautions for safe handling
described in this safety data sheet. Wash thoroughly after dealing with a spillage.

6.2. Environmental precautions

Environmental precautions Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Approach the spillage from upwind. Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labelled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

6.4. Reference to other sections

Reference to other sections For personal protection, see Section 8. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists.	
Advice on general	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash	
occupational hygiene	contaminated clothing before reuse. Do not eat, drink or smoke when using this product.	
	Wash at the end of each work shift and before eating, smoking and using the toilet. Change	
	work clothing daily before leaving workplace.	
7.2. Conditions for safe storage, including any incompatibilities		
Storage precautions	Store away from incompatible materials (see Section 10). Store in accordance with local regulations.	
Storage class	Unspecified storage.	
7.3. Specific end use(s)		
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.	
SECTION 8: Exposure Controls/personal protection		

RS Pro Contact Treatment Grease

8.1. Control parameters

8.2. Exposure controls

Appropriate engineering controlsProvide adequate ventilation. Good general ventilation should be adequate to control work exposure to airborne contaminants.	ər
Eye/face protection Eyewear complying with an approved standard should be worn if a risk assessment indica eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. The following protection should be worn: Chemic splash goggles.	
Hand protection Chemical-resistant, impervious gloves complying with an approved standard should be were a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, glove should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended	s e I
Other skin and bodyAppropriate footwear and additional protective clothing complying with an approved standsprotectionshould be worn if a risk assessment indicates skin contamination is possible.	rd
Hygiene measuresProvide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.	
Respiratory protectionRespiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.	
Environmental exposure Not regarded as dangerous for the environment.	

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Appearance	Grease.
Colour	Beige.
Odour	Oil-like.
рН	Not available.
Melting point	Not available.
Initial boiling point and range	Not available.
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.

Revision date: 21/02/2017

Revision: 0

RS Pro Contact Treatment Grease

Upper/lower flammability or explosive limits	Not available.	
Vapour pressure	0.001 mm Hg @ 20°C/68°F	
Vapour density	Not available.	
Bulk density	1.11 kg/l	
Solubility(ies)	Not available.	
Partition coefficient	Not available.	
Auto-ignition temperature	Not available.	
Decomposition Temperature	Not available.	
Viscosity	Not available.	
Explosive properties	Not considered to be explosive.	
Oxidising properties	Does not meet the criteria for classification as oxidising.	
9.2. Other information		
SECTION 10: Stability and rea	activity	
10.1. Reactivity		
Reactivity	See the other subsections of this section for further details.	
10.2. Chemical stability		
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.	
10.3. Possibility of hazardous	reactions	
Possibility of hazardous reactions	No potentially hazardous reactions known.	
10.4. Conditions to avoid		
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.	
10.5. Incompatible materials		
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.	
10.6. Hazardous decomposition	on products	
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.	
SECTION 11: Toxicological information		
11.1. Information on toxicological effects		
Toxicological effects	Not regarded as a health hazard under current legislation.	
Acute toxicity - oral Notes (oral LD₅₀)	Based on available data the classification criteria are not met.	
Acute toxicity - dermal		
Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.	

Revision date: 21/02/2017

Revision: 0

RS Pro Contact Treatment Grease

Notes (inhalation LC ₅₀)	Based on available data the classification criteria are not met.
Skin corrosion/irritation Animal data	Based on available data the classification criteria are not met.
Serious eye damage/irritation Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.
IARC carcinogenicity	Contains a substance/a group of substances which may cause cancer. IARC Group 1 Carcinogenic to humans.
Reproductive toxicity Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - development	Based on available data the classification criteria are not met.
Specific target organ toxicity -	single exposure
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.
Specific target organ toxicity -	repeated exposure
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.
Aspiration hazard Aspiration hazard	Based on available data the classification criteria are not met.
General information	No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin contact	Prolonged contact may cause dryness of the skin.
Eye contact	May cause temporary eye irritation.
Route of entry	
	Ingestion Inhalation Skin and/or eye contact

Propylene carbonate

Acute toxicity - oral

Acute toxicity oral (LD₅₀ 33,520.0 mg/kg)

Revision: 0

RS Pro Contact Treatment Grease

Species	Rat
ATE oral (mg/kg)	33,520.0
	Quartz (SiO2)
Carcinogenicity	
IARC carcinogenicity	IARC Group 1 Carcinogenic to humans.
	Benzotriazole
Acute toxicity - oral	
Acute toxicity oral (LD ₅₀	560.0
mg/kg)	
Species	Rat
ATE oral (mg/kg)	560.0
Acute toxicity - dermal	
Notes (dermal LD₅₀)	LD₅₀ > 2000 mg/kg, Dermal, Rabbit
Skin corrosion/irritation	
Skin corrosion/irritation	Not irritating.
Serious eye damage/irritati	on
Serious eye damage/irritation	Causes serious eye irritation.
Skin sensitisation	
Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Genotoxicity - in vitro	Data lacking.
Carcinogenicity	
Carcinogenicity	There is no evidence that the product can cause cancer.
Reproductive toxicity	
Reproductive toxicity - fertility	Data lacking.
Specific target organ toxicit	y - single exposure
STOT - single exposure	Data lacking.
Specific target organ toxicit	
STOT - repeated exposure	Data lacking.
Aspiration hazard	
Aspiration hazard	Not anticipated to present an aspiration hazard, based on chemical structure.
Inhalation	Dust in high concentrations may irritate the respiratory system.
Ingestion	Harmful if swallowed.
Skin contact	Skin irritation should not occur when used as recommended.

Revision: 0

RS Pro Contact Treatment Grease

	Eye contact	Irritating to eyes.	
SECTION 12: Ecological Information			
Ecotoxicity		ot regarded as dangerous for the environment. However, large or frequent spills may have azardous effects on the environment.	
		Benzotriazole	
	Ecotoxicity	Toxic to aquatic life with long lasting effects.	
12.1. Toxicit	У		
Toxicity		ased on available data the classification criteria are not met.	
		Benzotriazole	
	Acute toxicity - fis	LC₅₀, 96 hours: 180 mg/l, Brachydanio rerio (Zebra Fish)	
	Acute toxicity - aq invertebrates	tic EC₅₀, 48 hours: 15.8 mg/l, Daphnia magna	
	Acute toxicity - microorganisms	EC₅₀, 3 hours: 1060 mg/l, Activated sludge	
12.2. Persis	tence and degrada	t <u>v</u>	
Persistence	and degradability	ne degradability of the product is not known.	
		Benzotriazole	
	Persistence and degradability	The product is not expected to be biodegradable.	
12.3. Bioacc	cumulative potentia		
Bioaccumula	ative potential	o data available on bioaccumulation.	
Partition coe	efficient	ot available.	
		Benzotriazole	
	Bioaccumulative p	ential The product is not bioaccumulating.	
12.4. Mobilit	y in soil		
Mobility		o data available.	
	Benzotriazole		
	Mobility	The product is soluble in water.	
12.5. Results of PBT and vPvB assessment			
		Benzotriazole	
	Results of PBT ar assessment	/PvB This product does not contain any substances classified as PBT or vPvB.	

12.6. Other adverse effects

Revision date: 21/02/2017

Revision: 0

RS Pro Contact Treatment Grease

Other adverse effects	None known.
	Benzotriazole
Other advers	e effects Not determined.
SECTION 13: Disposal co	nsiderations
13.1. Waste treatment me	thods
General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.
SECTION 14: Transport in	formation
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).
14.1. UN number	
Not applicable.	
14.2. UN proper shipping r	name
Not applicable.	
14.3. Transport hazard cla	ss(es)
No transport warning sign	required.
Transport labels No transport warning sign	required
14.4. Packing group	
Not applicable.	
14.5. Environmental hazar	ds
Environmentally hazardou	s substance/marine pollutant
14.6. Special precautions	for user
Not applicable.	
	cording to Annex II of MARPOL and the IBC Code
Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code	
SECTION 15: Regulatory	information

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Revision: 0

RS Pro Contact Treatment Grease

National regulations	Health and Safety at Work etc. Act 1974 (as amended). The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"]. EH40/2005 Workplace exposure limits.
EU legislation	Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended). Commission Regulation (EU) No 2015/830 of 28 May 2015. Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended).

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

Inventories

EU - EINECS/ELINCS

None of the ingredients are listed or exempt.

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	 ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road. ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways. RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail. IATA: International Air Transport Association. ICAO-TI: Technical Instructions for the Safe Transport of Dangerous Goods by Air. IMDG: International Maritime Dangerous Goods. CAS: Chemical Abstracts Service. ATE: Acute Toxicity Estimate. LC₅₀: Lethal Concentration to 50 % of a test population. LD₅₀: Lethal Dose to 50% of a test population (Median Lethal Dose). EC₅₀: 50% of maximal Effective Concentration. PBT: Persistent, Bioaccumulative and Toxic substance. vPvB: Very Persistent and Very Bioaccumulative.
Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.
Issued by	Bethan Massey
