

Qoltec Wireless Headphones with microphone Super Bass | Dynamic | BT | Black

Product code: 50851

Qoltec wireless headphones are the perfect solution for those who appreciate the combination of functionality, convenience, and superior sound quality with super bass. The control panel located on the headphone will give you full control.

EXPERIENCE SOUND WITHOUT INTERFERENCE

Qoltec multimedia headphones are the perfect solution for people who appreciate the combination of functionality, convenience and the highest quality sound with super bass, without interference and noise.

The design process of the **DYNAMIC** headphones was oriented towards the optimal use of Bluetooth technology, to enable stable wireless signal transmission and obtain the best sound quality without interference. **Bluetooth 5.0** standard allows us to transmit data even faster, so the sound signal is transmitted lossless without delay. A range of up to 10 meters provides freedom of movement.

Experience the rich sound of the streamed signal on all acoustic wave frequency bands.

SUPER BASS

Dive into the depths of sound and experience sound on a whole new level. Our **SUPER BASS** technology allows you to reproduce the acoustic spectrum of low notes in detail. You'll hear what was previously beyond your reach. **DYNAMIC** isn't just a name, it's a dynamic audio modulation technology that allows you to best match the transmission power to specific parts of your favourite songs. The digital low-frequency boost allows you to hear powerful sounds as you rediscover your favorite music.

Choose comfort

Headphones means the freedom to choose what we want to listen to and when, whether it's a favorite album, an interesting podcast, or an audiobook. Therefore, absolutely nothing should limit us and affect our comfort. Your complete relaxation is guaranteed by the adjustable headband, which can be adjusted to the individual shape of your head, and the oval shape of the headphones, ensuring a proper fit. The headphones can be folded, which makes them much easier to store and transport. **DYNAMIC** model is equipped with a memory card slot and built-in FM radio, so you can listen to music even when your phone will discharge. The control panel on the headphone allows you to switch to the next/ previous song, increase/decrease the volume, answer/reject the incoming call.
