

- **Double-coated enamelled copper coil wires DN2E** in 200 C class.This product is produced in twenty, the most popular cross-sections, in the range from Ø 0,15mm/SWG 38 till Ø 2,00mm/SWG14.
- **The wires** are winded evenly and compactly, on **250g** reels, and foiled additionally with shrink-wrapped cover, ensuring perfect visual effect, protecting against getting dirty during their storage and preventing oxidation of outer insulated coat.
- **The wires**, used by us, are of German manufacture, being the top quality and classified as **EI/AIW - Class Grade 2**.They are produced according to **IEC 60317-13 norm** in **RoHS standard**.
- **The wires** of this category can be used both to making professional winding, being exposed to very high overload and work in exceptionally hard conditions and to simple hobbyist works.
- **The usage of doubled insulated coat**, consisiting of polyesterimid and polyamidimid ensures the exceptional softness, overload resistance, thermal and mechanical stability and enables the considerable increase of breakdown voltage level **over 5kV**.

The diameter of the vein	Product Name	Maximum temperature in ° C	Wire Size in SWG	number on the spool	Weight in Kg single spool	Maximum voltage increment in KV

Basic parameters

Parameters of doubled enamelled DNE2E 200 copper wires:

- **Conductor diameter of the vein in mm :**
 - Ø 0,15mm; Ø 0,20mm; Ø 0,30mm;
 - Ø 0,40mm; Ø 0,50mm; Ø 0,60mm;
 - Ø 0,70mm; Ø 0,80mm; Ø 0,90mm;
 - Ø 1,00mm; Ø 1,10mm; Ø 1,20mm;
 - Ø 1,30mm; Ø 1,40mm; Ø 1,50mm;
 - Ø 1,60mm; Ø 1,70mm; Ø 1,80mm;
 - Ø 1,90mm; Ø 2,00mm
- **Wire dimension in SWG :**
SWG 38/36/31/27/25/24/22/21/20/19/18/17/16/15/14
- **Quantity winded on spool :**
 - For od 0,15mm: 1600 mb
 - For od 0,20mm: 854 mb
 - For od 0,30mm: 403 mb
 - For od 0,40mm: 220mb
