

HA1388

18W BTL Audio Power Amplifier

The HA1388 is specifically designed for Components Car Stereo Amplifiers.

This power IC provides an output power of 18 watts at 13.2 volts to 4 ohm load with 10 percent distortion and can be used without output capacitors because of the excellent ASO protection circuit.

FEATURES

- Can be used as OCL.
- Over voltage handling capability up to 50 volts for 200ms pulse duration.
- Less number of external components.
- Thermal shutdown circuit included.
